xLogic SuperRelay…

New expansion module:

65-ELC-E-PT100

POWER: DC12-24V

3 channel PT100 inputs 10-bit or 12-bit resolution optional

65-ELC-E-AQ-V

POWER:DC 24V

2 channel analog outputs (DC 0-10V)

65-ELC-E-AI(I)

POWER: DC12-24V

4 channel analog inputs (0/4-20 mA)

65-ELC-RS485

POWER: DC12-24V
Converter from RS485 port(2x8pin) of CPU to 3 channels wiring terminals, With isolation

New!

New Function

1. PWM block can output up to 333Hz frequency signal for "Q5","Q6" of ELC-18DC-D/DA-TN model
2. SMS module not only can send alarm message ,but also can send messages include IO status ,analogue input value and parameters of function block to users mobile numbers directly!
3. in the monitor mode of xLogicsoft , outputs can be activated .
4. Ethernet module can be used as Server(Slave) and xLogicsoft can be used as Client.
